| component-platform-service | 2026.07.22       | /v2/component-onboardings | SUPPORTED_NATIVE  |

### Secret Manager

| Oblast      | Pravidlo                                                                                                      |
|-------------|---------------------------------------------------------------------------------------------------------------|
| Resolve API | secrets.{PUBLIC_BASE_DOMAIN} /v1/secrets/resolve                                                              |
| Autentizace | Bearer integration token nebo Basic client_id:client_secret; OAuth access token se nepoužívá pro resolve.     |
| Lifecycle   | Credential autenticita a explicitní secret grant; lifecycle stav komponenty credential pro Secret API neruší. |
| Úložiště    | AES-256-GCM envelope with HKDF-SHA-256 key derivation from CONFIG_VAULT_MASTER_KEY_BASE64                     |
